

# What is the TPP?

The Trans-Pacific Partnership (TPP) would create a super-treaty which would jeopardize the sovereignty of the nations involved by giving their power to large corporations like **Wal-Mart, Monsanto, Goldman Sachs, Pfizer, Halliburton, Philip Morris, GE, GM, and Apple.**

- There are currently 11 nations involved: **US, New Zealand, Australia, Brunei, Chile, Malaysia, Peru, Singapore, Vietnam, Mexico and Canada.** Japan has shown interest.
- The economic power of this group is **more than 40% larger than the 27- nation European Union.**
- TPP will **offshore millions of good-paying jobs to low-wage nations**, undercutting working conditions globally and increasing unemployment.

- TPP will expand pharmaceutical monopoly protections and institute longer patents that will **decrease access to affordable medications**
- TPP will limit food GMO labeling and allow the import of goods that **do not meet US safety standards.**
- TPP will institute **SOPA, PIPA, and CISPA-like regulations** and internet measures which restrict our right to free speech.
- TPP will **roll back Wall Street regulations**, and prohibit bans on risky financial services.

**... unless we let them know  
"No Deal!"**
